

Care and Maintenance

Cleaning

Hand cleaning of the glass surface to visibly remove accumulated dust or fingerprints can be accomplished using a number of different glass cleaning products.

Procedure

- Spray the glass surface with the cleaning solution or with a cloth saturated with the cleaning solution. Be generous with the amount of solution applied.
- Scrub the wet surface with a clean, lint free towel or cloth.
- Wipe with a dry, clean, lint free towel or cloth

DO NOT use cleaners which contain Hydrofluoric or Phosphoric acid as they are corrosive to the glass surface.

DO NOT use abrasive cleaners, powder based cleaners, harsh scrub pads or other harsh materials on micro-crystal products.

AVOID using tapes or adhesives unless they are known to be easily removed. Some tapes or adhesives can stain or damage glass surfaces.
