

Care and Maintenance

Cleaning

- Upon completion of installation, allow silicone to dry prior to cleaning (approximately 24 hours).
- Use a mild soap solution and wipe dry with a soft cloth or sponge.
- Do not use scouring or caustic cleansers as they can damage the surface of the frame and glass as well as any decorative or plastic parts.

Safety and Caution

- **Do not** climb or hang heavy objects on the shower enclosure.
- Use care when opening the shower door to avoid hitting objects that could damage the shower enclosure.
- Good air circulation is important to minimize moisture and avoid mold buildup in shower enclosure.
- Due to wet floor surfaces, use caution when stepping in and out of the shower enclosure.

Care and Maintenance

- Check shower enclosure on a regular basis.
- Repair or replace loose or damaged fittings.
- To avoid water leakage, check and repair PVC seal.
- Clean and lube sliding or rolling parts on a regular basis.
