

Care and Maintenance

Belstone's solid surface shower pan base is a hard, non-porous surface that prevents dirt from accumulating and resists stains.

Cleaning

- Use common household, non-abrasive cleaners for most cleaning jobs. Follow manufacturer's directions and precautions. Rinse well and dry with a soft, clean cloth.
- Remove dust or dry dirt with a soft, damp cloth.
- Clean grease, oil, paint or ink stains with isopropyl (rubbing) alcohol. Dry with a soft, dry cloth.
- For more stubborn stains, use a mild abrasive cleaner such as Soft Scrub or Bon Ami. It may take a little more scrubbing to actually remove marks and polish surface. A gray Scotch Brite pad may also be used. **DO NOT USE** the green Scotch Brite pads on the solid-surface shower bases as it will destroy the finish.
- Avoid using razor blades or other sharp objects that might scratch the surface.
- **Do not** use harsh chemicals, such as hydrochloric acid, sodium hydroxide, paint thinner, chloride solvents or any strong acid or base, as this will permanently damage the finish.
- Small scratches may be removed by sanding with 1500 grit wet/dry paper and then cleaning with Soft Scrub.
